

Online registration and submission of technology profiles

At first, register to the brokerage event:

www.b2match.eu/mobilis2011

After your registration, you will be required to submit a technology profile (offer, request or partner search) that will be published online. The earlier you submit it, the better chance you stand of being selected and identified by other participants. Participants will be informed when they can make their meetings selections.

Then, validate your participation to Mobilis when the registrations are open on-line:

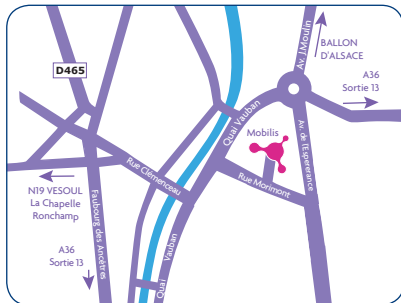

www.mobilisconference.com

Date

15th and 16th November 2011

Venue

Atria, Belfort

Entrance fee

The brokerage event is free of charge for participants already registered to Mobilis conferences. But for those who are not interested in attending these conferences, they will have to pay anyway the fee (220,00 euros VAT included).

On-line registration www.mobilisconference.com

Hotels

Participants must contact directly the hotels (pre-reservations have been made by the conference organizers). Please see list of hotels on Mobilis conference website.

Urban Mobility Brokerage Event

15th and 16th November 2011
Belfort, France

Business Support on Your Doorstep

Mobilis, international conferences on urban mobility

Mobilis has been organized by the "Pôle Véhicule du futur" cluster for past 8 years. It takes place every year, either in Franche-Comté or in Alsace (East of France). Dedicated to urban mobility, these conferences gather participants from different countries.

Mobilis 2011 will take place in Belfort on 15th and 16th november 2011. It will consist in plenary conference, round table talks, workshops and an exhibition presenting innovative projects.

European Brokerage event

During the 2 days conferences, companies and research laboratories are given the opportunity to participate in a brokerage event based on one-to-one confidential meetings between technology developers and users in order to foster technical cooperation.

The brokerage event will be the occasion to deepen the contacts made during conferences, workshops and round tables.

Brokerage events organized by Enterprise Europe Network are well appreciated by European companies. It is a good way to meet several potential partners in a short time.

- » Meet and discuss product development, manufacturing, licensing or other technological partnerships
- » Find partners to build a solid base from which to approach new markets
- » Make international contacts to promote innovative technologies or know-how
- » Discover ideas or technologies as innovation boosters
- » Get the latest information on the current technological trends and research activities
- » Initiate technology transfers
- » Integrate European R&D projects

With time, meetings generally lead to concrete partnerships.

“Attending Mobilis brokerage event was very productive and useful to identify partners. We have submitted a European project with one of the contacts met during the event. ”

Philippe CANALDA, LIFC Omni Team

155 meetings organized in 2010

“Thanks to the brokerage event, FC LAB institute could identify and meet industrial partners for applied research. Projects have been clearly identified and collaborations are considered. ”

Jean-Marc LE CANUT, FC LAB

Topics of the brokerage event
