Today...

- ✦ In a few minutes, you get your tank filled for more than 500km drive.
- ✦ This is done in a public dedicated place called gas station.

Tomorrow...

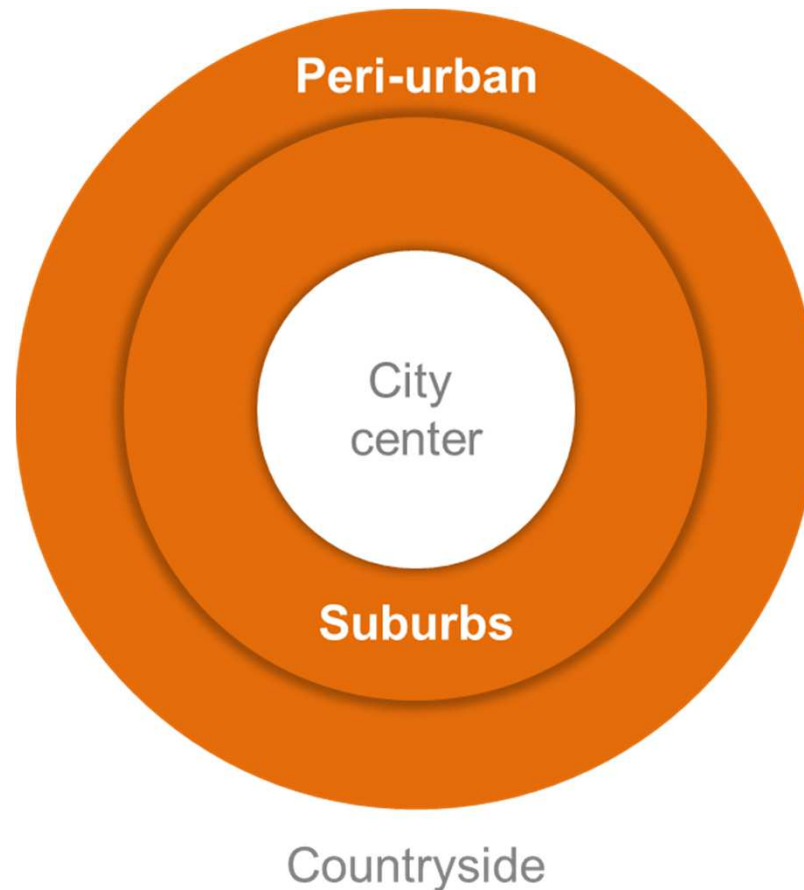

- ❖ Charging an electric vehicle takes from 20-30mn up to several hours.
- ❖ Charging an EV can be done every where electricity is accessible. At home, at the office, in the car parks, in the street...

When is a car available for charging?

- ❖ At home over the night.
- ❖ At the office during the working hours.

Who could be the most interested by EM?

Hager – our market positioning

- ❖ Offer solutions for charging at home and at office.
- ❖ Offer ergonomic features to make life easy: cable and plug management – simple machine user interface
